¹⁰ For example, the authors of the *Journal of the American Medical Association* (JAMA) have argued that the "most important" reason for the decline in the number of physicians is the "increasing emphasis on medical specialization" (JAMA, 1990, p. 1000).

 The following table provides information on the various types of
 organizations that are members of the National Association of
 Public Child Welfare Administrators (NAACWA). The table
 lists the name of the organization, its address, and the name
 and title of the person who is the primary contact for the
 organization. The table also includes information on the
 organization's membership, its financial status, and its
 activities. The table is organized into columns for the
 organization's name, address, contact person, membership,
 financial status, and activities.

Section 87(2)(g) The following information has been redacted from this document:

in 1941, the first year of the war, the number of people in the United States who were employed in the defense industry was 10 million. By 1945, the number had increased to 15 million. This was a significant increase, especially considering that the total population of the United States at the time was approximately 130 million. The increase in the defense industry workforce was a direct result of the war effort, which required the production of large quantities of military equipment and supplies. The government's mobilization of resources and the shift in public opinion towards supporting the war effort were key factors in this increase.

Figure 1: Experimental design. The diagram illustrates the sequence of events in the experiment. It starts with a 'Stimulus' (a word) being presented. This is followed by a 'Response' (a button press). The response is then followed by a 'Feedback' (a light or sound). The diagram is divided into two main sections: 'Stimulus' and 'Response'. The 'Stimulus' section shows a word 'Stimulus' being presented. The 'Response' section shows a button being pressed. The 'Feedback' section shows a light or sound being presented. The diagram is labeled 'Figure 1' and 'Experimental design'.
